Red Line shows approx location of the East fence line which is on the neighbouring land (crown land)

Oil company installed culvert to allow crossing the water draw

SW22-55-9-W5 - 157.44 acres. Pasture land. Annual surface lease rent payment has not been received since 2019. The oil company holding the lease is bankrupt. There will likely be no further payments received for this lease. Lease road access is grass trail only. East fence line is not on the property line and is encroaching on the neighbouring land (crown land). It is believed that the encroachment is approximately 140 feet ± at the north end & over 200 feet at south end. North fence line is wire for electric fence & runs along the cleared trail to the north of the property.

# Soil Map

**AGRICULTURAL SOIL CLASSIFICATION:** The Agriculture layer shows the varying potential of a specific area for agricultural production. It indicates the classes and subclasses according to the Soil Capability Classification of Agriculture, which is based on characteristics of the soil as determined by soil surveys. The mineral soils are grouped into 7 classes and 13 subclasses according to the potential of each soil for the production of field crops. Organic soils are not a part of the classification and are shown as a single separate unit (O).

## 1.2 AGRICULTURAL SOIL CLASSES

CLASS DESCRIPTION

1	No significant limitations in use for crops
2	Moderate limitations that restrict the range of crops or require moderate conservation practices.
3	Moderately severe limitations that restrict the range of crops or require special conservation practices
4	Severe limitations that restrict the range of crops or require special conservation practices
5	Very severe limitations that restrict capability in producing perennial forage crops. Improvement practices are feasible.
6	Capable only of producing perennial forage crops and improvement practices are not feasible
7	No capacity for arable culture or permanent pasture
O	Organic Soils (not placed in capability classes)

## 1.3 Agricultural Subclasses

Subclass Description

C	Adverse Climate
D	Undesirable soil structure and/or low permeability
E	Erosion
F	Low Fertility
I	Inundation by streams or lakes
M	Moisture limitations
N	Salinity
P	Stoniness
R	Consolidated bedrock
S	Combinations of subclasses
T	Topography
W	Excess Water
X	Soils having limitations resulting from the cumulative effect of two or more adverse characteristics
