Vehicle History Report + Lien Check

Lien Check

✔ No lien records found in **British Columbia**.

How We Check for Liens

CARFAX Canada uses the VIN to search government records in each Canadian province and territory (excluding Northwest Territories) where the vehicle is currently registered and where it has historically been registered. We do not check for liens or title in any U.S. state.

If a VIN has no registration records in Canada, we cannot check for liens. We cannot guarantee lien checks on trailers, recreational vehicles or heavy-duty equipment.

Purchasers should always get written confirmation from vendors that there is no lien on the vehicle.

CARFAX Canada Canadian Lien Guarantee

If for some reason our lien check fails to accurately reflect the Canadian enforceable lien status of a vehicle at the time of the search, CARFAX Canada will reimburse the party that purchased the report and relied on it to their detriment to a maximum amount of (1) the value of the car (2) the value of the lien (3) Five Thousand Dollars Canadian (\$5,000.00), whichever is lower.

Recall #: N212340980 | Rear Toe Link Separation Recall Date: 2021 Jun 24

Recall Description

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2010 to 2016 model year Cadillac SRX and 2011 to 2012 Saab 9-4x vehicles. These vehicles may have received improper service requiring adjustment of a rear suspension toe link. In rare cases, dealers or independent repair shops may not have followed GM's published procedures for torquing the jam nut in the toe link adjusters to the proper specification. A loose toe link can cause the vehicle to sway or wander at highway speeds or allow water or other corrosive elements to enter the threads within the adjuster. If a toe link is improperly adjusted, corrosion combined with vehicle motion may eventually cause the threads within the link to wear and loosen. In very rare cases with continued use, the link could separate. Separation while the vehicle is being driven increases the risk of a crash.

Remedy

Dealers will replace the adjustable toe link with a design that prevents adjustment.

Recall #: N140457 | REAR TOE LINK ADJUSTER LOCK NUT TORQUE Recall Date: 2014 Sep 12

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2010-2015 model year Cadillac SRX vehicles and 2011-2012 Saab 9-4X vehicles. On some of these vehicles, the jam nut in the rear suspension toe adjuster link may not be torqued to the proper specification. A loose toe adjuster link can cause the vehicle to sway or wander at highway speed, activate the vehicle's electronic stability control system, and cause excessive wear to the threads in the link. Additionally, the rear suspension may make loud metallic noises, particularly when the vehicle is travelling over bumps or potholes. If the threads in the link become worn, the link may separate.

Remedy

Dealers will replace both right and left rear toe links and perform front and rear toe alignment.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact CADILLAC or visit [GM's website](#).
