Grill Chef Barbeque	BBQ Utensils
Fry Wizard Greaseless Fryer	

Exterior

The exterior is blue tin laden, rivetted to structural framing.

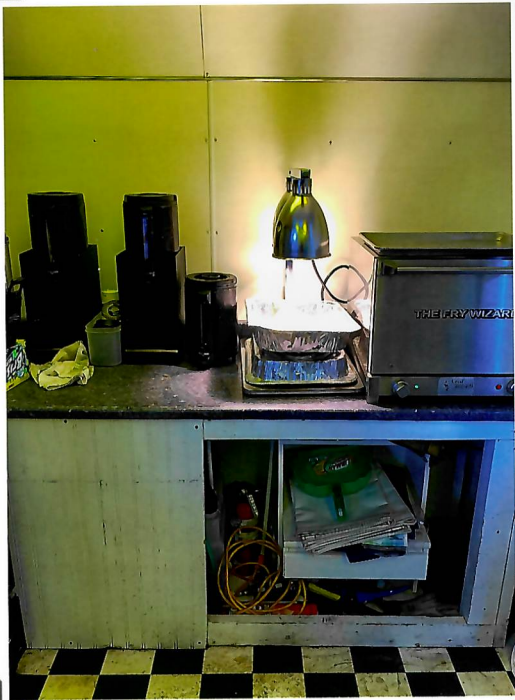

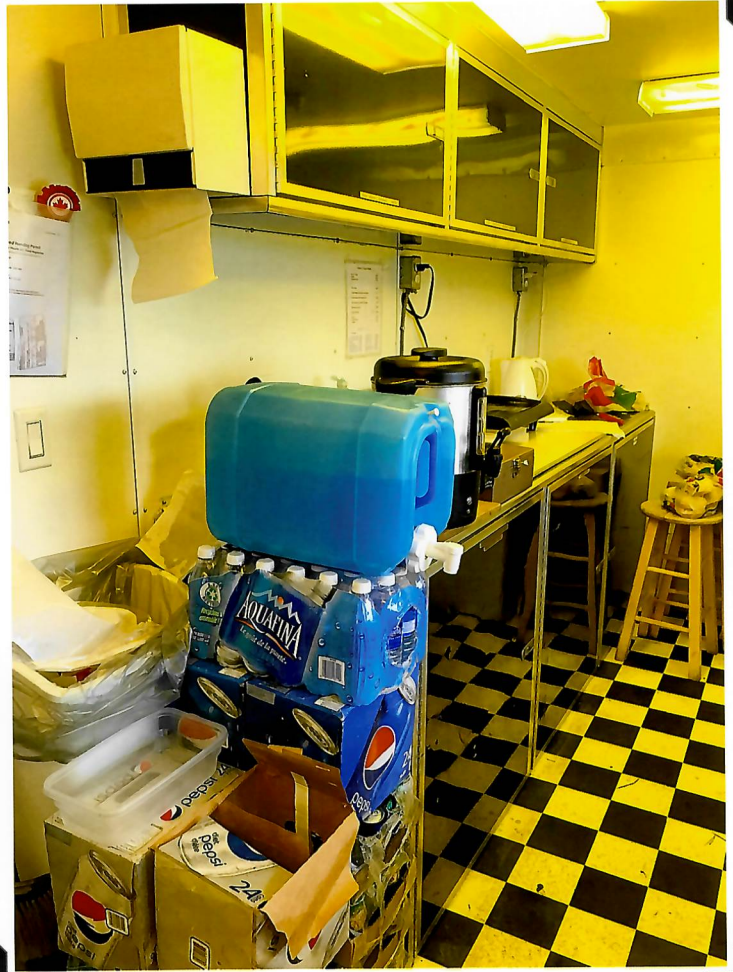

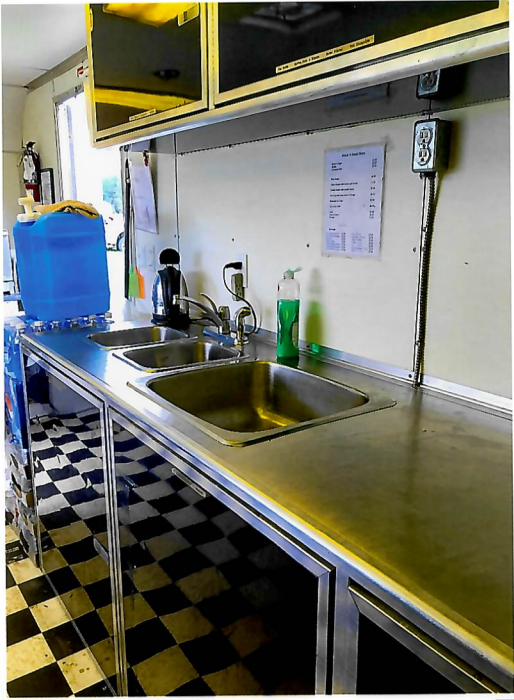

Front of trailer holds a checker plated rock guard.

Top round has a chrome finish, great for company logo.

Hand made skirting finishes off the exterior look, can be attached as a full wrap around or sectional. It prevents children from crawling up the tires to see in.

All lighting is fully functional.

Single roof vent.

The Interior

The open concept design of this trailer leaves it fully functional for an array of equipment to be set up.

Counter top surfaces are food grade stainless steel.

Triple wash sink system.

Electric hot water tank is located under the wash sinks.

40 gallon fresh water tank is located under the front counter, with an exterior fill station.

50 gallon grey water holding tank is located in the right rear corner, within the cabinetry. The holding tank can be dumped using an exterior valve, and camlock collapsible sewage hose displaces liquids away from the trailer.

Interior cabinetry is finished to match exterior surface.

Walls are durable and easy to wash, white in color.

Checker board linoleum.

Interior lighting is fluorescent and has a yellow finish to deter bugs.

Ceiling vent, hand cranks open, with a 12 volt fan.

Interior 12 volt cargo light.

Both the fan and cargo light work, but towing vehicle must be wired accordingly.

The trailer is currently wired to draw from a 50 Amp power source.

When using 50 Amp power both factory installed plug ins and the second line of power (silver plug-ins) can be drawn from.

Power can be reduced to 30 Amp, however, only the factory installed plug-ins or the silver line of power should be drawn from independently.

Power can be reduced from 50 Amp to 30 Amp to 110 Volt, doing so allows plugging in a fridge, freezer, or setting coffee urns on timers.

Grill Chef Barbeque

Commercial Grill Chef Barbeque

The cooking surface is 2' X 4 ½', capable of cooking 30 burgers at once. The cooking surface consists of cast grills which hold the heat well to prevent hot spots.

2 Pancake Grills cover ½ of the cooking surface

BBQ Cover

2 Tarps for wrap around wind protection.

When side tables are fully expanded the barbeque measures 2' X 9'

Uses 2 - 20 lb propane tanks.

Parts are easily obtained through Grill Chef, in Lachine, Quebec. This is a great company to deal with, shipping parts without hesitation.

Many spare parts are included with the barbeque, including new burner plates.

The barbeque collapses for easy storage and moving.

Keating Keep Krisp Heat Lamp

110 Volt

2- 250 watt Infrared Heat bulbs

Adjustable heights

Classic APW Wyatt
Steam Table

Inserts for warmer

2- 9.5" x 5" x 4.5" deep

2- 9.5 x 11" x 3" deep

2- 5"x 5.5" x 4.5" deep

2- 5.5" x 11"x 4.5" deep

3- 5" x 9.25" x 3" deep
