This vehicle history report is based on [information](https://www.carfax.ca/vehicle-history-data) (https://www.carfax.ca/vehicle-history-data) that was reported and available to CARFAX Canada as of August 07, 2024 (or once all the data was collected from our data sources and the report was complete). CARFAX Canada draws on billions of data records from thousands of sources across North America, and we receive new historical data records every day. **There may be other information about this vehicle that has not been reported to CARFAX Canada.** When buying a used vehicle, we always recommend using a CARFAX Canada Vehicle History Report, along with a vehicle inspection and test drive, to make an informed decision.

# Vehicle History Report + Lien Check

## Lien Check

- ✔ No lien records found in **Alberta**.
- ✔ No lien records found in **Saskatchewan**.

### How We Check for Liens

CARFAX Canada uses the VIN to search government records in each Canadian province and territory (excluding Northwest Territories) where the vehicle is currently registered and where it has historically been registered. We do not check for liens or title in any U.S. state.

If a VIN has no registration records in Canada, we cannot check for liens. We cannot guarantee lien checks on trailers, recreational vehicles or heavy-duty equipment.

Purchasers should always get written confirmation from vendors that there is no lien on the vehicle.

### CARFAX Canada Canadian Lien Guarantee

If for some reason our lien check fails to accurately reflect the Canadian enforceable lien status of a vehicle at the time of the search, CARFAX Canada will reimburse the party that purchased the report and relied on it to their detriment to a maximum amount of (1) the value of the car (2) the value of the lien (3) Five Thousand Dollars Canadian (\$5,000.00), whichever is lower.

## Accident/Damage

INCIDENT DATE	DETAILS	AMOUNT
❗ 2018 Sep 15	<b>Alberta, Canada</b>	
	<b>Claim:</b> Theft	\$7,796.00
❗ 2018 Oct 15	<b>Lethbridge, Alberta, Canada</b>	
	<b>Estimate:</b> Right Side Front   Estimate Date: 2018 Oct 12	\$7,996.98

## Registration

- ✔ This vehicle has been registered in the following locations in **Canada** (listed oldest to newest):
  - In the province of **Saskatchewan** with **Normal** branding.
  - In the province of **Alberta** with **Normal** branding.

**We checked for:** Inspection Required, Normal, Non-repairable, Rebuilt, Salvage and Stolen.

## Open Recalls

Recall #: N172085440 | Loss of Steering Assist Recall Date: 2017 Jun 29

### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014 model year Chevrolet Silverado LD and GMC Sierra LD vehicles. These vehicles may experience a temporary loss of electric power steering (EPS) assist followed by a sudden return of EPS assist, particularly during low-speed turning maneuvers. The loss and sudden return of EPS assist typically happens within a 1 second period and is caused by an electrical/software issue. If EPS assist is lost and suddenly returned, the driver could lose temporary control of the steering wheel, increasing the risk of a crash.

### Remedy

Dealers will perform a reflash of the EPS module software.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (https://my.gm.ca/gm/en/recalls)

Recall #: N192217410 | Reduction in Vacuum Brake Assist – Canada Only Recall Date: 2019 Jun 27

#### Recall Description

General Motors has approved a safety recall in Canada for certain 2017 model year Chevrolet Silverado LD, GMC Sierra LD, Cadillac Escalade, Chevrolet Suburban, Chevrolet Tahoe, and GMC Yukon vehicles, that, in some circumstances, may have a condition in which the engine-mounted mechanical vacuum pump output may decrease over time, decreasing the amount of vacuum/power brake assist. If the vacuum level drops, customers may experience increased brake pedal effort, hard brake pedal, and/or potentially increased stopping distance. The Driver's Information Centre (DIC) "Service brake assist" alert will activate 2-5 minutes after the vacuum level drops, and a Diagnostic Trouble Code (DTC) will also be set. Even where this condition occurs, the hydraulic brake system remains functional. The condition is more prevalent at low speed when softly applying the brakes. Failure to follow recommended oil change intervals could contribute to this condition.

#### Remedy

Dealers are to reprogram the electronic brake control module (EBCM).

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (https://my.gm.ca/gm/en/recalls)

Recall #: 2016007 | Frontal Airbag and Pretensioner Non Deploy Recall Date: 2016 Sep 09

#### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014-2017 model year Chevrolet Silverado LD, GMC Sierra LD, Buick Encore, Chevrolet Trax, Chevrolet Caprice Police, and Chevrolet Corvette vehicles, 2014-2016 model year Buick Lacrosse, Chevrolet Spark EV, and Chevrolet SS vehicles and 2015-2017 model year Chevrolet Silverado HD, GMC Sierra HD, GMC Yukon, GMC Yukon XL, Cadillac Escalade Cadillac Escalade ESV, Chevrolet Suburban, and Chevrolet Tahoe vehicles. The sensing and diagnostic module (SDM) in these vehicles, which controls airbag and pretensioner deployment, contains a software defect which may prevent the deployment of frontal airbags and pretensioners in certain rare circumstances. If the frontal airbags and seatbelt pretensioners do not deploy when required, there is an increased risk of injury to occupants in a crash.

#### Remedy

Reprogram the SDM with new software that eliminates this defect. In vehicles with any previous deployment events recorded in the SDM, dealers will replace the existing SDM with a new SDM prior to programming and setup. Note: Before replacing the SDM, any airbag related Diagnostic Trouble Codes should be identified, diagnosed, and corrected prior to SDM replacement. Faulty SIR components in need of replacement are unrelated to this safety recall and are not covered under the terms of this safety recall.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (https://my.gm.ca/gm/en/recalls)

Recall #: N150822 | SEATBELT LAP ANCHOR TENSIONER CABLE Recall Date: 2016 Apr 11

### Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014–2015 model year Chevrolet Silverado 1500 and GMC Sierra 1500 vehicles. The flexible steel cable that connects the driver's seat belt to the outboard side of the seat (the "tensioner cable") can fatigue and separate over time as a result of occupant movement into the driver's seat.

### Remedy

For used and customer vehicles, dealers will enlarge the side shield opening, install a pusher bracket on the tensioner, and if necessary, replace the tensioner assembly free of charge. For unsold new vehicles, dealers will replace the retractor assembly.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (<https://my.gm.ca/gm/en/recalls>)
