INSPECTION

CORRECTION:

Dec 6/2023, 4127H:

Went to start swather, battery dead. Put on charger with generator and began inspection of swather. Wrote down all issues noted with the swather. Started swather and ran up header. Noted all issues with the header. Drive over to shop and recheck for any new leaks, check oil levels in final drives and knife drive gearbox. Fuel level was low, put 20L from a can into tank as machine can not reach fuel tank in yard with the header installed. Install center skid shoes, check coolant strength (-35). Park back by road.

Dec 8/2023, 4127H

Look up part numbers to quote the repairs required on the header and swather.

4125H-2024/09/11

performed service from inspection

- Changed engine oil and filter
- Changed hydraulic oil and filters
- Checked planetary oil level
- changed top rad hose
- changed a little hose on the oil cooler
- changed light bulb on cab
- put new pins in for header
- changed the knives on the rotor shears and one knife on the cutter bar
- put a new yield sign on
- charged the battery. Battery is weak, may need to be
